Official Paper of Cochise Co.
THURSDAY, OCTOBER 26, 1899.

The insurance companies that thought they could beat the Missouri law have not only discovered their error, but they have contributed about \$100,000 in fines to the state treasury.

So many men are now claiming responsibility for the surrender of General Toral at Santiago that only the general himself can settle the matter to the satisfaction of the public. It has been intimated that he holds General Blanco responsible.

It is said by a leading and well informed New York stock broker and financier that the only stocks to buy now are those which the bank will accept as collaterals. This may be considered another stab at trust stocks, for there are few of them that the banks anywhere will take as collaterals.

It is already known that Germany will want all the apples we can spare of this year's crop, which will insure a good price for the entire product, whether for export or domestic consumption. Export shipments have already been made from New York to meet the demand in Germany, which is at least a month earlier than usual. It is expected that not less than 100,000 barrels will be shipped to Germany this season.

The latest government statistics show that the total Indian population of the United States is nearly 250,000. There are altogether 350 different tribes, looked after by 71 Indian agents. The total number of schools of all kinds especially devoted to the education of the redskin is 350, with property valued at \$3,500,000, of which two-thirds represents the value of school property on the various reservations. It thus appears that the government is carrying on in behalf of the red Indian one of the greatest educational works of the century.

IRON. BINGER HERMAN, Commissioner of the General Land Office, has decided in a case arising in Colorado that it is unlawful to take coal from public lands under the coal declaratory act, and that parties purchasing coal thus obtained can be held responsible for the value thereof until the government has recovered full satisfaction for the amount of trespass. This means that claimants have not the privilege to mine coal for sale or speculation, and that the purpose of a coal declaratory statement is to protect the claimant in preference to right of entry of mines opened and improved by him.

A REMARK overheard in Prescott the past week, says the Prospect, that the speaker did not care for development capital—only wanting a cash bonus put up in a deal for his mining claims—recalls the old theories and practice prevailing in the transfer of mining interests and the changed conditions that have gradually obtained in this direction in western mining circles. The right of the owner to impose any condition he desires in tying up his mining claim is perfect and unquestioned, but it must not be forgotten that in these latter prosaic mining days the average purchaser is pretty apt to view his prospective investments in a matter-of-fact way, figuring closely the probable outlay before a profitable product can be expected, and he smiles incredulously at the usual enthusiasm of those who have claims. The Oms stands right in with every prospect owner to get all he can for his claims, but if the other fellow "crawfishes" because of the price or conditions don't call him names therefor. The point of this paragraph is that the buyer has the same rights and privileges in buying that the seller has in selling—to look out for self interest as his judgment may direct.

During the winter of 1897 Mr. James Reed, one of the leading citizens and merchants of Clay, Clay Co., W. Va., struck his leg against a cake of ice in such a manner as to bruise it severely. It became very much swollen and pained him so badly that he could not walk without the aid of crutches. He was treated by physicians, also used several kinds of liniment and two and a half salons of whisky in bathing it, but nothing gave him relief until he began using Chamberlain's Pain Balm. This brought almost a complete cure in a week's time and he believes that had he not used this remedy, his leg would have had to be amputated. Pain Balm unequalled for sprains, bruises and rheumatism. For sale by all druggists.

Crippled by Rheumatism.

Those who have Rheumatism find themselves growing steadily worse all the while. One reason of this is that the remedies prescribed by the doctors contain mercury and potash, which ultimately intensify the disease by causing the joints to swell and stiffen, producing a severe aching of the bones. S. S. S. has been curing Rheumatism for twenty years—even the worst cases which seemed almost incurable.

Capt. O. E. Hughes, the popular railroad conductor, of Columbia, S. C., had an experience with Rheumatism which convinced him that there is only one cure for that painful disease. He says: "I was a great sufferer from muscular Rheumatism for two years. I could get no permanent relief from any medicine prescribed by my physician. I took about a dozen bottles of your S. S. S., and now I am as well as ever was in my life. I am sure that your medicine cured me, and I would recommend it to any one suffering from any blood disease."

Everybody knows that Rheumatism is a diseased state of the blood, and only a blood remedy is the only proper treatment, but a remedy containing potash and mercury only aggravates the trouble.

S.S.S. For Blood

being Purely Vegetable, goes direct to the very cause of the disease and a permanent cure always results. It is the only blood remedy guaranteed to contain no potash, mercury or other dangerous minerals.

COPPER IS THE METAL

The Cochise Copper Mining Company, Bisbee, Arizona.

This company owns a very valuable group of mines situated in Warren mining district, county of Cochise, Arizona, lying immediately east of and adjoining the town of Bisbee, and adjoining the property of the Copper Queen Consolidated Mining company on the north. The latter company has been in operation for about twenty years, and employs about 1,500 men daily in the operation of its mammoth mine and smelters, and as a result has produced copper to over 34,000,000 pounds during the year 1898, and the net proceeds of such production are reported to have been over \$2,000,000, and it has been said by experienced miners who have been under its employ for years, that the Queen mine now has sufficient ore in sight to keep it in constant operation for the next twenty years without further development.

Is it not reasonable to believe that the property of the Cochise company is fully as valuable, when it is within such close proximity to such a wonderful mine?

The blasts set off in the underground workings of the Queen property can easily be felt and heard at the shaft of our mine, and oftentimes the concussion has attracted marked attention.

The original owners of these valuable mines are local business men, well and favorably known in Bisbee and surrounding vicinity, who are doing their utmost to make this enterprise a success in every respect. The board of directors are original owners, and are donating their services to the company until such time as the mine will pay dividends. They own the controlling interest in this property, and as a protection to stockholders have placed their entire interest in escrow for a term of one year.

The stock books of our company are now open for subscriptions, and a limited number of shares are offered at ten cents per share. No application for less than 100 shares will be accepted. The company reserves the right at any time to advance the price of shares without further notice, or to reject any application for stock at their discretion.

Every cent received from the sale of stock will be expended toward the development of our property and the erection of hoisting works, and all other necessary improvements, and to make our enterprise a success in every particular.

We invite investigators and their experts or their engineers to closely scrutinize our property. Applications for shares may be made to any of the directors of the company, or to any of our legally authorized representatives.
